

## Anchor Coating

Product Code	Components	Viscosity	Solid Content (%)	Solvent Base	Solvent	Printing Machine	Features	Application
AC1003GXI	Two-component	50~150	9~11	Water Based	Water, IPA, Methanol for Resin Water, IPA, Methanol for Hardner	Extrusion lamination	<ul style="list-style-type: none"> <li>For promoting adhesion of extruded resins to various kinds of films</li> <li>Excellent initial bonding strength and short curing time, Low odor</li> </ul>	<ul style="list-style-type: none"> <li>Suitable for food packing and various industrial adhesive</li> <li>PET, OPP, NYLON, Paper and so on</li> </ul>
AC1017GEI	Two-component	1500~2000	49~51	EA Based	Ethyl Acetate For both Resin & Hardner	Extrusion lamination	<ul style="list-style-type: none"> <li>For promoting adhesion of extruded resins to various kinds of films</li> <li>Excellent heat resistance and chemical stability</li> <li>Excellent initial bonding strength and short curing time</li> </ul>	<ul style="list-style-type: none"> <li>Suitable for food packing and various industrial adhesive</li> <li>PET, CPP, NYLON, Paper and specially recommended for AL foil</li> </ul>
